

YANKEE[®] 2022

DENTAL CONGRESS

January 27 - 29, 2022

Boston Convention & Exhibition Center

ENDODONTIC SPECIALTY SYMPOSIUM

SATURDAY, JANUARY 29, 2022

640SL

Lecture

8:30 am - 12:00 pm

\$115*

3 CE Hours

*Tuition includes coffee and pastry break with an opportunity to network with peers.

An Update on Outcome and Imaging of Apical Periodontitis

Is every failure following a regular root canal treatment simply due to the inability to perform the best treatment, or do the systemic health and the individual genetic make-up influence the response to endodontic treatment? Should we boost the immune system? Ultrasound Imaging in Endodontics, in addition to being a safe imaging technique, can provide information on the size, tissue characteristics, and vascularity of bone lesions, in a dynamic mode. This aspect seems to play a major role in the development of a preliminary differential diagnosis of bone defects of pathologic origin in the jaws.

- Discuss the significance of persistent apical periodontitis
- Cite the reasons for a negative outcome of root canal treatment
- Evaluate the possible role of medications in healing of apical periodontitis
- Recognize the best imaging techniques to assess bone lesions of apical periodontitis
- Assess the limitations of radiographic techniques
- Discuss the possibility of using ultrasound examination in endodontics

Elisabetta Cotti, DDS, MS

received her DDS from the University of Cagliari – Italy and the Specialty Certificate and MS in Endodontics from the University of Loma Linda- California. She is Full Professor of Conservative Dentistry and Endodontics, and the Chairman of the Department of Conservative Dentistry and Endodontics at the School of Dentistry, University of Cagliari-Italy. She is currently the Director of the Post Graduate programme (Master) in Clinical Endodontics at the University of Cagliari. She practices limited to Endodontics, and is the author of several articles and chapters in the field of Endodontics with a specific interest in apical periodontitis.

Endorsed and co-sponsored by the Massachusetts Association of Endodontists

ADA CERP[®] | Continuing Education Recognition Program

The Massachusetts Dental Society is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education. Provider Recognition at ADA.org/CERP
